inadequate investigation (?)

no independent investigation available (?)

Accident report

In Croatia, demining accidents are investigated by the police and the reports are not made available to the public. In response to a request, the country MAC made available a spreadsheet record of accidents in November 2006. The spreadsheet data is so summarised that it is not possible to tell much about the circumstances surrounding the accident, but some detail may still be of use. For example, the device involved in the accident is identified, and some of the injuries recorded.

In this case the victim was a "foreigner" from Zimbabwe working as a "deminer" when a PROM-1 was initiated and he was killed.

If possible, this record will be extended with further detail at a later date.

Victim Report

Victim number: 583	Name: [Name removed]
Age:	Gender: Male
Status: deminer	Fit for work: DECEASED
Compensation: Not made available	Time to hospital: Not recorded
Protection issued: Not recorded	Protection used: Not recorded

Summary of injuries:

FATAL

COMMENT: No medical report was made available. The injury was simply described as "Fatal".

Analysis

Without more detail it is not possible to assign a Classification or a Cause to this accident.
