## Accident report

The only report of this accident that has been made available to date was in a UNMACCA spreadsheet covering Mine accidents in 2008 and 2009. The conversion of the data into a DDAS file shows how spreadsheets summarise to the exclusion of including essential information. Text in square brackets [ ] is editorial. This record will be revised as more information becomes available.

The summary is reproduced below, edited for anonymity.

**Analysis**

The primary and secondary causes of this accident are listed as *Other* because there is not enough information to judge whether the UXO was missed or whether the Victim carelessly kicked a rock outside the cleared area onto it.

The “Inadequate investigation” listed under notes refers to the absence of a full accident report. The UN supported MACCA has failed to make these widely available for some years in contravention of the requirements of the IMAS.
