Status: deminer	Fit for work: not known
Compensation: Not made available	Time to hospital: Not made available
Protection issued: Not recorded	Protection used: Not made available

Summary of injuries:

INJURIES: minor Hearing, severe Eye, severe Head

COMMENT: No Medical report was made available.

Analysis

The primary cause of this accident is listed as *Other* because there is not enough information about the accident to determine what happened. The secondary cause is listed as a *Field Control Inadequacy* because the Victim's eye injury indicates that he was not wearing PPE correctly, and this error was not corrected by his field supervisors.

The "Inadequate investigation" listed under notes refers to the absence of a full accident report. The UN supported MACCA has failed to make these widely available for some years in contravention of the requirements of the IMAS.
